

Patient Questionnaire

Making a Difference in Prostate Cancer Care

Michigan Urological Surgery Improvement Collaborative (MUSIC)

Your urologist is part of MUSIC. The goal of MUSIC is to improve care for men with prostate cancer in the state of Michigan. This includes men currently facing prostate cancer, as well as men diagnosed with prostate cancer in the future. Urologists around the state have come together to participate in MUSIC and improve prostate cancer care.

As part of these efforts, the MUSIC-Patient Reported Outcomes (PRO) survey collects health related information from men scheduled to have radical prostatectomy surgery (removal of the prostate). Your responses to this survey will provide better information about your symptoms and function both before and after surgery. This information can be used by your doctor to help you and other patients achieve the best possible recovery after prostate cancer surgery.

As part of MUSIC, your urologist will use the online registry to collect and store information about your health and quality of life before and after your surgery, including your responses to these surveys. Questionnaires will be sent before your surgery and again 1, 3, 6, 12, and 24 months after. Reports will be provided back to your urologistand may become part of your medical record. This information will be essential to our efforts to improve surgical care and quality of life for men in Michigan with prostate cancer.

Your contact information will only be used by MUSIC to help with the online website and to help your urologist collect your responses. MUSIC is required by law to protect your health information. Completing these questionnaires is encouraged, but voluntary. If you prefer not to receive information in the future, please send a message to the MUSIC Coordinating Center by emailing, <u>musicurology@umich.edu</u> or calling 855-456-2035. Thank you.

Benefits of Completing MUSIC-PRO Questionnaire

- Save time by completing questionnaires before appointments with your urologist
- Track your recovery after prostate cancer surgery: The MUSIC-PRO report helpyou and your urologist monitor your quality of life after surgery.
- Help other patients: Your participation will also help improve care for future patients with prostate cancer.

Your health. Your family. Your legacy.

Please complete the attached survey. Print your name, sign, and date below. Thank you.

Patient Name (print):

Patient Signature:

Date completed (MM/DD/YYY):

This questionnaire is designed to measure Quality of Life issues in patients with Prostate cancer. To help us get the most accurate measurement, it is important that you answer all questions honestly and completely.

Remember, as with all medical records, information contained within this survey will remain strictly confidential.

The following questions pertain to your **urinary continence** following your surgery.

- 1. Over the **past 4 weeks**, how often have you leaked urine?
 - ☐ More than once a day
 - About once a day
 - ☐ More than once a week
 - ☐ About once a week
 - ☐ Rarely or never
- 2. Which of the following best describes your urinary control during the last 4 weeks?
 - ☐ No urinary control whatsoever
 - ☐ Frequent dribbling
 - ☐ Occasional dribbling
 - ☐ Total control
- 3. How many pads or adult diapers <u>per day</u> did you usually use to control leakage **during the last4** weeks?
 - None
 - 」 1 pad per day
 - ☐ 2 pads per day
 - \exists or more pads per day

4. How big a problem, if any, has each of the following been for you **during the last 4 weeks**?

	No	Very Small Problem	Small	Moderate Problem	Big
a. Dripping or leaking urine	0	1	2	3	4
b. Pain or burning on urination	0	1	2	3	4
c. Bleeding with urination	0	1	2	3	4
d. Weak urine stream or incomplete emptying	0	1	2	3	4
e. Need to urinate frequently during the day	0	1	2	3	4

- 5. Overall, how big a problem has your urinary function been for you **during the last 4 weeks**?
 - J No problem
 - J Very small problem
 - J Small problem
 - J Moderate problem
 - Big problem

The following questions pertain to your **pain management** this past year.

6. Were you prescribed opioid/narcotic medication when discharged from the hospital after your surgery? (e.g. Norco, Vicodin, oxycodone (Percocet or OxyContin), Tylenol 3 or 4, Tramadol/Ultram)

JYes

JNo (Skip to #10)

Patient Questionnaire

7. What type of opioid/narcotic medication was prescribed? (Check all that apply)

			- · · ·	
	Medication	How did your receive this medication?	What was the DOSE of the medication?	What AMOUNT of medication did you receive?
				medication did you receive:
	Hydrocodone	Υ Pill/Tablet	Ύ5-325mg	Υ
	(Norco,		Ύ 7.5 - 325 mg	
	Vicodin,		Ύ 7.5 - 500mg	
	Lortab, Lorcet, etc)		Ϋ́Other
